The first European definition of the term "family" emerged in the 1830s during a period of reconstruction and transformation of modern society. Before the 1830s, family was considered to be a sociological phenomenon and was based on the concept of the state. Consequently, most reforms that were intended to organize society were completely outside the family. After the transition to democracy in the 1830s and the rapid changes brought about by the industrial and technological revolutions, the modern definition of the family emerged as a new social order based on. Based on the official definition, the family is a natural social phenomenon and cultural construct that includes biological and non-biological groupings of adults who are related by blood ties and established. With a strong appeal to the principle of freedom, this book set a new social paradigm and contributed to the development of modern society. This book "family", originally published in 1971, was reissued in various forms in the late. The
