run time is also low on battery.

**\*Main features\*** - Easy to use interface - a lot of shortcuts on the left pane. - A tool to help you transfer data from the SD-Card to your computer. - Play music files and browse your files **\*What i would change\*** - The left pane should be a little more customizable - If i had known about the data transfer tool i would have got my files off of my Tinypad. - Make the file list more customizable. Overall i would rate the program a 10/10. I will update the review when i get

Awesome...Best app I have ever  
found! The App is very easy to use.  
The main screen consists of file  
explorer. It is really good at the  
transfer of files between my phone  
and my computer. The music player  
is really good because you can  
preview the file and play songs in  
the background. The best feature of  
the app is the data transfer. You can  
transfer files from the phone to  
your computer directly. Now you no  
longer have to connect the phone to  
your computer to send files. I have

the app on my sony-ericsson xperia. The app worked great so far. I have downloaded a couple of apps and they have crashed when I use the music player. Pino della Porta Dec 19, 2008 Most helpful app. I would recommend this app to anyone who has a Sony Ericsson mobile phone or a Xandros based laptop. This is one of the most helpful apps I have ever come across. In just a few minutes, I was able to create a nice file manager on my phone, transfer images from my phone to my PC and even listen to music from the

phone. I don't see myself using another file manager. Antonio Corti  
Oct 31, 2008 As requested, a screenshot I installed it on my HTC Touch Pro2, it's a very good app, but it does have some problems The main problem is that it hangs during an update, and the workaround for that is to restart the phone. I also encountered another problem, when the app starts, it looks like the phone freezes and crashes, even when the phone is plugged to a USB. The app has many other problems, but I still think that it's a

good app and I have used it for a long time, so it's a must for any Sony Ericsson phone, or any X
