September 14, 2016 (LifeSiteNews) — A billboard in the U.S. states that assisted suicide is "a right of the terminally ill," and a major pro-abortion group in the state thinks it can help push it forward. The billboard, which has popped up in New Hampshire, the first state to vote in a U.S. presidential election this year, says that the new presidential race could "define the future of the assisted suicide movement." "I want to end my life," states the billboard, adding that "I have lived nearly eight years with metastatic breast cancer, and I wish to die in the most comfortable way I can imagine." According to former president of the American Civil Liberties Union and co-founder of the American Life League Margaret Sanger, "the ideal of the future is easy of access, and these people will be worked, worked, worked until they die."
