You can easily configure what programs are permitted to run, and you can also schedule certain applications to be launched at a particular time. All actions are logged in detail. PerfApp is a desktop tool - all programs are run in the background and in a separate process - that cannot be shut down by the user, even if it is terminated by the operating system or other applications. Please note that PerfApp does not replace a system administrator. The monitor only processes the background programs and the launching/opening of these programs. When using this software you also need to have a comprehensive monitoring and control system in place, such as LogWatch.

What's New in the Perfect Admin?

```
***** File Perfect Admin - v.0.1 (March 6, 2005) *****
