Automatically Run Or Close Programs At Certain Times Software Crack+ X64

Automatically Run Or Close Programs At Certain Times Software is a small Windows application designed specifically for helping you launch or terminate programs at a user-defined time. User-friendly layout The well-organized set of features makes it easier for you to discover and tweak the program's dedicated parameters. Plus, you can quickly turn on or off the process. Closing and running options The tool gives you the possibility to enable or disable the closing or running mode and terminate EXE files by name (for example: Notepad.exe) or if window contains user-defined characters. What's more, you can build up lists with the programs that you want to close or run, test the app's capabilities, as well as make the utility terminate or launch files every hour (you can enter the time in hours, minutes, and seconds), daily at a certain time, as well weekly on a custom day. Performance Since it doesn't require much computer knowledge to set up the dedicated parameters, even less experienced users can learn to master the entire process in no time. During our testing we have noticed that the utility carries out a task quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not hampered. Bottom line To sum things up, Automatically Run Or Close Programs At Certain Times Software offers a straightforward software solution for helping you launch or terminate applications at a custom time. Its intuitive layout makes it ideal for rookies and professionals alike....
