You can create a digital image by manipulating your real-world files to fit your vision or by working directly with the raw data contained within an image file. Digital art is the foundation for all visual arts. Creating a digital image gives the creator unlimited opportunities. Digital art can be anything from a drawing to a photograph or even a collage. Traditionally, digital art is created in the program of the medium. In other words, if you're creating a print file from an image file, use the program that created the image. If the midterm election results are any indication, this year's upcoming midterms may be the most hotly contested in decades. Since Donald Trump became president, the Republican Party has seen a spike in voter turnout. One of the hallmarks of Trump supporters is that they tend to vote more consistently than Democrat and Independent voters. It's also true that Republicans are far more likely to vote in midterm election years. "There is no doubt the increase in Republican turnout has been in the midterm election cycle in particular," said Mark Jones, director of elections and research at the National Republican Congressional Committee. But Jones says part of the reason for the increase is that voters pay more attention to midterm elections because they know that they're deciding the direction of the country for the next few years. "If people have an agenda that is a clear agenda, they're going to be more likely to vote in the midterms to actually check it out. That's one of the reasons this midterm cycle has been so spirited," he said. Jones says Trump's race to the White House was filled with partisan rancor. "When you see the first action by a president is almost entirely in opposition to the Democrats and it had a big impact on how people felt about voting. If you voted for president at that point, there was a lot of pressure on you to vote Republican," he said. "If you voted for a Democrat, there was less of an expectation to vote for the Democrats." When the Democrats took control of the House of Representatives last year, that same dynamic played out. Jones says while it's true that Democrats campaigned heavily for voters, they were reluctant to go out and vote themselves and even less so to let others go out and vote for them. Jones said he thinks it contributed to the massive Republican turnout in some of the House races. "People are demanding accountability, they're saying, 'Hey look at what you're doing. Look what you're doing,'" Jones said. One of the things Jones says Republicans have to be mindful of is that Democratic voters who now identify as Independents may not vote at the same rates as those who actually consider themselves Democrats. He says Trump's low job approval rating and failure to pass major legislation during his first two years in
