It's a simple, but well executed little game that makes for a nice antidote to the hyperactive, objective based gameplay that's prevalent in modern game design. It's a Flood of little stories. A dark and mystical place where animals are crazy and the walls are alive... but somehow aren't controlling you. Play as the last surviving creature of a great flood, before the walls close in to crush you and everything you love. It's also a story where you are a fish that wants to live. Live in the water, swim, eat if you're hungry. If you're fast enough, you'll avoid anything in your way as you race towards the hole in the wall. Game Features:

Explore the Flood: Immerse yourself in a world destroyed by mysterious, relentless tides, where the wicked step in tiny triumphs and you bear witness to their misdeeds. Challenge and Compare: There's no match for the challenge, to stay alive long enough to see the game's end. Track a high score board against your own best as well as your friends. Multiple Game Stories: Dozens of scenes, all told in their own unique, funny style. Be (Almost) Animalistic: Swim through the Flood, wriggle along the floor, chase things, and stick to walls. Catch the Delicious and Lonely: Jump, slither and wiggle, picking up powerups as you go, while avoiding the hungry predators that follow. The Flood 2: Download now on Google Play, AppStore, and Amazon! Book of Unwritten Tales 2 Ω - 5 Ω The world is dying, but life goes on. Summary Start the game with one of four different heroes, each with their own story. But no one can survive for long in this haunted, dead world. You only live to tell the tale. So write it. As you continue through the game, a fantastical mystery unfolds around you. And then it's up to you to decipher the clues and tell the tale. Book of Unwritten Tales 2 - A free demo to the full game. The story is an adventure about an old tale told by an old man, about the first written book. Book of Unwritten Tales 2 - The full game, with more than 100 adventures. Book of

What's new:

Online The final chapter Category: Media I'm trying to prepare a documentary series about real world online capabilities. I've decided to make it a 15 minute format with animation and voice track, along with some websites. I would like to outsource the creative direction and the animation execution because I need experience in these aspects. For the voice track, I chose MCQ. I will need some extra time to finish the preparation and I might need some additional help in the field of sound engineering. This project is going to be mainly about progression systems. Anyone done on this topic is welcome to become part of this project. I need someone who can:

- analyze how progression systems work in the real world to create a simplified version of that system.
- collect information about / from progression systems or capabilities.
- find us examples of something, a game, a company, a culture that doesn't use any progression system.
- explain other missing aspects.

A simpler version of Ubisoft Online Gaming System (Partner ANR), revealed in 2012 by Ubisoft studio. It is clearly influenced by the Company of Heroes 2 framework and sample based game design styles.

Modifications of the Online Gaming System (OGS) and the Company of Heroes 2 models, sometimes have matching characteristics. Partner ANR:

- Season/Rank - Clasification - Progress points accumulate after each training session - Gain XP, items and more on all your nodes, that can be used on each other when you level up.
- You progress individually - Combining nodes result in a faster improvement, but higher node costs, or a mix of nodes - You start on level 1 Node 0, gaining XP with every node you reach and battle experience with them.
- Players can select the game mode, your role and the node you're applying for.
- You gain points for finishing enemies nodes and cards, but not player nodes/troops.
- A meter will indicate the priority of the training.

Company of Heroes 2 System.

- Level - XP - Experience gained - Unit Level and other stats increase - Unit selection and balances are important - Unit roles can define the missions on your own - Node unlock Point threshold, unlock them by defeating Node Gain or Bank Raid (sending to Ops Ark) -

Positive/negative/neutral feedback on the node, included in the indicator icon. Wasn't very interesting,

In order not to mess up your file, I suggest you use the Windows built-in compression utility, compress.exe, to compress the File CR.exe

Then extract the folder containing "CR.exe" into your e32 file, and keep the folder on your desktop, in order to use it later. There is actually also an Autolt script to extract this folder in the File Viewer Window, you may use it to extract CR.exe files. See How to extract single files from ZIP archives using AutoHotkey?

Now that we have extracted the "CR.exe" folder, we can proceed and unpack it.
