Mr.Addon comes from the early 80's, where he was born as a Frankenstein. He was created by the Emperor Solomon as a disposable weapon, but he was considered as the "greatest creation" of the Emperor. Since then, Mr.Addon has been a legendary figure in the world of science and he is now the last of his kind. He is a lonely creature who lives alone in an abandoned Martian surface, waiting for the Time of Awakening, which will put an end to his days. Mr.Addon desires to bring you back the future with a sun so bright that it will burn your enemies into a thousand times smaller things. Your mission is to eliminate the Federation's machines and find the Big Human inside of the facility. He will battle system maintenance technicians, Dominion aliens, replicating cyborgs and the madness that the Power of his Cosmic Rebirth gives him, giving you the power to throw multi-frequency rays of incredible energies and throw them into the enemies, turning them into exploding mounds. Use the elements, teleportation portals, and solve the "sharp" puzzles of this adventure, while you enjoy viewing the pictorial work of Peláez Ochoa and the musical work of unTIL BEN. Mr.Addon is a cosmic renegade who has come to a section of the Sulpicius Gallus M crater to help awaken the "Big Human" who remains asleep within. He accompanies Mr. Addon on this not-for-the-faint adventure, where he will battle system maintenance technicians, Dominion aliens, and replicating cyborgs. Use your powers to bring together what is above and what is below by turning your enemies into exploding moons! Complete the 3 levels in a row and kill their 3 final bosses. - Why would anybody pay \$1.99 for a game like this?
 - True Demon sounds more like a bad movie than a good game.
 - Why did you call it True Demon?
 - How did you name it?
 - True Demon doesn't stand for the truth. That's kinda mean.
 - Do you really have a dragon?
