## Easy ToolBox Download

In order to provide a better, safer internet experience for internet users, this toolbox manages multiple antivirus products and provides a single interface for managing all of them. Built with the assistance of a technical manager who will help provide the best components, this toolbox will keep your system protected from any possible virus infection. It will also give you suggestions for future updates. To delete unnecessary files for your safe and optimum computer experience, this toolbox will check for the files in your system and provides you with complete information about them, including the size, file type, name, date added and other properties. It also cleans the registry problems and data and offers to find and fix the created problems and deletes the problems with a timely manner. To easily clean your system drive and delete the virus as well as the malware from your system, it will scan the files on your system drive, identify and clean the malware and the virus, and remove them with a single click. If you want to clean the junk and the cache files which will be removed very soon, you can delete them. Further features:

- It will create a timer which can be set to any time of your preference.
- It will also allow you to rename the computer name.
- It will make backup of your system, and it will allow you to delete the junk files and separate files from junk with a single click.
- It will identify your primary hard drive and name it as Primary Hard Drive and it will prompt you for the second hard drive.
- It will be compatible with both Windows XP and Windows 2000.
- It is the easiest application to delete unwanted temporary files, junk and cache files.
- This tool is the best to remove the temporary files and junk files.

• It will also have an option to create a time scheduler that allows you to have a perfect time to clean up your computer. NOTE: If you are running a Windows XP computer, you will have to download the free Norton Toolbox.
