### What's new:

Force was a short-lived Japanese animated science-fiction militaristic side-scrolling tactical war 2-D animation series created by Shiai Tei and produced by Toei Animation's Solar System Division. The series was also distributed internationally, except in North America, by Wonder Kids under the title Space Operators. The story takes place 2,000 years in the future. Many of the characters in the series look ahead to the future. The setting is outer space, after many years of two-dimensional tachyon space travel, Earth has been seceded by its rebellious cities who seek to conquer and pillage outer space. The backstory of this series is detailed in the series' opening second season. Anime News Network listed Cosmos Defense Force as one of the best-selling anime of the 1990s. The story also inspired the English-language live-action/anime series, also titled Cosmo Dunk, which aired in the United States during 1993. Plot The futuristic anime series is presented as follows: 2,000 years in the future, in the year "2000 A.D", earth has been divided into five nations: the United States of America (which was founded by the centralized US military), the East Asian United Republic (founded by the East Asian Union), the Incan Empire, the Great Western Suralian Empire, and "Pureland", a former Imperial territory to which the pure human race migrated from Europe. Non-native imperialistic states such as "Solowsky" and "Weeping Star" exist as well. The governments of these nations are all ruled by totalitarian governments, in which all citizens are indoctrinated with the propaganda of their respective nations and use forced labor to support the warfare economy. According to the story, this is the second time earth has been divided into different nations. The previous time the nations were divided was to protect the earth's environment during the final stage of Earth's space travel, and then to disseminate the human genome across the galaxy. However, after the emergence of the new Eastern Federation, the Native American war becomes a prominent point of the story. Losing many of its territories to these opposing nations, the United States has become a giant, but assimilated nation, facing Japan. The story takes place as the Native Americans are fighting the alien invader, and the Suralian Empire versus the other nations of Earth. Characters : : : : : :

In All Walls Must Fall, you're an explorer in the universe of not-very-recent Earth. The place is filled with robotic entities -- and you're here to liberate it. Using only 3D glasses and 3D controllers, you have to navigate a tangled, claustrophobic apartment complex and destroy every enemy by throwing objects at it. If you've ever played a game such as Broforce, this is similar, only with music and a story. All Walls Must Fall is a very simple retro game. You use a '7' shaped controller, the right analog stick controls your movement in 3D space, and the left analog stick controls your 'lock on' to enemy. Use your skills to reach objectives, from collecting supplies to destroying electronics. Developed by a small team in Berlin, all funding came from a successful Kickstarter campaign. New features: - 30+ hours of music - 3D sound - Progression through two game modes and two difficulties - 3D models of robots used to set the mood - Adjustable music volume - Different music channels - No loading times - BGM themes written by members of the team and sound designers - Four types of enemies: Humanoid robots, Metal robots, Armored robots, Drones - 300+ enemy designs - Audio analysis from the game's code - A full record of enemy movements and attacks// (C) Copyright 2005 Matthias Troyer // (C) Copyright 2006 Douglas Gregor // Use, modification and distribution is subject to the Boost Software // License, Version 1.0.
