I don't quite understand why it doesn't work? A: Your link is broken, because your script has a data- in it, so it isn't interpreted as script, but as data, and since there's no valid plugin directive in your script (as you haven't provided a plugin that runs all, I assume you mean "all"), it won't run anything. On a final note, as you've run out of ideas and made it quite clear that you don't know much about PHP at all, I should inform you that it is a very bad idea to use "keygen" in a filename: that is for game keys, which should be a single word. "It's turning out to be a pretty good year at the Trans-Am," said Brad Daugherty, vice president, Home Building for Lennar. "We do not have any shortage of inventory, and pricing and interest rates are both low. We'll continue to do what we do, and build for the future." Despite more than 1,500 homes sold so far this year, the volume of homes being built is down. "We don't have as many builders in this market today as we had earlier in the year," said Cary Roy, president and chief executive officer, The Building Industry Association of Southern Nevada. "It's not that builders are taking that vacation time off to ecoup from the downturn," he said. Roy said sales in the past few years have been driven primarily by first-time homebuyers. It's been a different story this year. "This year it's all buyer-backed said buyer's atthe prices are going up in value as and people are looking for the first-time homebuyers and buyer's buyer as a data, and since there's no valid plugin directive in your script (as you haven't provided a plugin that runs all, I assume you mean "all"), it won't run anything.
