Yahoo An AOL Co-Founder Wants To Buy Them - LukeWroblewski ===== mixmax The only thing missing in this article is any mention of the money in it. And I'm not saying that as a journalist, but as a reader. EDGE COLOR GAME Most games are designed by big companies, such as nintendo and sony, and much effort is put into designing and developing, but the development period is likely to be longer. However, with games like "ground control to philadelphia" and "bomberman" from the new nintendo, we can also create games that are finely designed. The true art lies in the ability to nurture player imagination through the love of your game design, and it can't be limited to the concept stage of development. Also, I can't help but think that games that emphasize fantasy are extremely rare, and it's because "a shooter or a puzzle game" are so incredibly popular. Realistically speaking, the game market is growing, so it's hard to say that there is no future for fantasy games. In my opinion, one good example of a fantasy game that has succeeded is "the secret of mana" (There are only a few fantasy games released on mobile platform devices. However, they are quite popular, so I thought I'd introduce a fantasy game that uses the Android platform.
