Advanced Identity Protector is a free web browser tool, b7e8fdf5c8

Finally, secure important information using Advanced Identity Protector, a free utility that searches for remnants left on your machine and helps you locate them. The advanced data-collection and information-management tool quickly finds any lingering data you left behind, including name and email addresses, credit card info, passwords, login info and more. You don't have to do a lot to activate the tool's comprehensive ID protection; after you tell it what data to search for, it scans the registry, browser, and Windows file system for that information. Then the program lets you keep it, delete it, or exclude it from future scans. You can also set the tool to automatically scan all system and Internet Explorer MacDefender MacDefender is a free application designed to protect the Mac environment. It is a powerful malware protection program. It scans files and system folders for unauthorized or harmful software, detects malicious programs and provides a list of what to remove. It performs a virus and trojan scan to help you keep your Mac safe. Any files, active processes or objects detected as hazardous can be excluded from future checks. This is a really useful tool to protect the Mac OS environment. MacDefender Features: Scans for and removes different files, including cookies, Java, web browser plug-ins, ActiveX controls, DLLs, Macromedia Flash (FLV), Microsoft Office, Apple Scripts, custom Mac OS X settings, and more. Supports directory scanning. Quick removal of files from the quarantine or the trash. Detects and removes Spyware, Trojans, Worms, Rootkits, Dialers and Adware. Sybil information tracker. On Mac OS X, scanning can be done only on selected folders. This way, you can be more selective of the folders you scan. Norton SystemWorks Norton SystemWorks is the world's leading security software program that can protect your personal and professional information. It is a complete solution to your computer security needs. With basic, intermediate, and advanced protection systems, Norton SystemWorks can help you stay protected and secure. Logi Jack Logi Jack is a powerful personal firewall for Windows. Features such as customizable zones and user accounts help keep home users and businesses alike safe. These features can be customized and used to your preferences. Logi Jack can be used as a stand-alone protection tool or can be the main component of a layered security scheme. Logi Jack

#### What's New in the?

Advanced Identity Protector is a professional and handy tool for combing through your system. It can scan for various traces of information leftovers on your system. These leftovers are represented as digital tracks, similar to the regular email. Besides, these traces can be easily viewed, marked for storage, processed, or permanently deleted from your system. This way, your system will be free of materials for identity thieves. All you have to do is select what and how you want your traces to be treated. [b]Key Features: 1. Safely store personal or private information 2. Easily access deleted information 3. Manage protected information 4. Access information you may have deleted 5. Track files used 6. When you see a black and white image, click the image to see the list of options to get more information. Advanced Identifier Protector is an efficient application that dig up personal information from various environments and displays it to you. You can then choose to delete, store them in a safe place or mark them as exclusions. This way, your system will be free of potential material for identity thieves. Secure or exclude private information The Secure Vault is an internal feature that lets you store sensible information under an encrypted format. Also, the vault can only be accessed by providing a password, so if you want to be the only one accessing it, don't share the password. The vault can also be operated automatically, in relation with the Delete, Move to Secure Vault or Exclude commands. Furthermore, you can choose to permanently delete the info traces from your system, in order to maximize the identity theft protection or you can exclude them if you deem them harmless. The excluded traces are not going to be displayed in the scan results. Supported Environments Advanced Identifier Protector can scan for information leftovers in your browsers, mail clients and system files. Regarding the mail clients, only Outlook and Outlook Express are supported The main supported browsers are Internet Explorer, Firefox and Chrome; these are the standard scans. If you need to keep a browser out of the scanning process, simply uncheck the boxes near the title, and it
