In the middle of nowhere with no friends or allies, it's every man for themselves in a struggle for survival. Two teams of 25 players are dropped off onto different islands. They must scavenge for weapons, vehicles, and supplies while fending off dangerous animals. The objective of the game is simple: survive. It's a battle for goods and supplies, a race for weapons, and a fight for survival, all while avoiding being killed by desperate opponents in this battle for survival. After being dropped off onto the island, players scavenge for weapons, vehicles, and

supplies using only their sense of hearing. Some items can be found outside while others must be scavenged from other players. Each weapon has a limited number of bullets, which players are awarded every time they use the weapon. The player is the last remaining standing wins the round. GAMEPLAY: -Drop off Locations: The map is comprised of two areas, an open zone and a closed zone with multiple buildings. Ammo and Blue are available in certain buildings, while Assault is only available in the main area. -The Battle is made up of three phases. When the round starts, players are dropped off on the island. When the last player in each team is dead, only one side remains; those players face off in an elimination battle.
