The long-awaited 2021 Altair simulation software release is here! . and discrete elements such as simulating particles in an airflow are now possible. It will be the first simulation software to use a multi-core approach. . In addition to the multi-core approach, the software includes full multi-threading support, which means that every thread is used at the same time, not just one thread at a time. In addition to this, the software has support for multi-processor architectures, allowing it to handle multiple processors at the same time.

The software contains three applications that allow users to perform finite element simulations with a variety of different solvers. It supports a variety of both commercial and non-commercial formulations. Altair HyperWorks is a highly scalable simulation software that handles large and complex models with ease. The software contains a number of different development tools, including dedicated visualisers, libraries and analysis applications.Altair HyperWorks is a finite element simulation software developed by Altair Engineering.
